# ***CORVETTE***

The Sierra Defense Corvette is a highly regarded semi-automatic shotgun renowned for its reliability and versatility. Designed for military, law enforcement, and civilian applications, it boasts a gas-operated action and 12-gauge chambering. With its robust construction and self-regulating gas piston system, it cycles various ammunition flawlessly. The Corvette incorporates practical features such as a crossbolt safety, ghost ring sights, and a Picatinny rail for accessories. It has gained global popularity due to its exceptional reliability. The firearm is backed by a two-year warranty, ensuring reliability and support.

TRUGLO  
WHEN BRIGHTNESS COUNTS™

Sierra's Ghost Ring sights have a unique design that utilizes an aperture-style rear sight with two mini-dots and a front sight, which leads the eye to automatically center itself in the rear ring while focusing on the front sight. The result: immediate front sight acquisition.

The angle of our stock along with the inertia gas system reduces muzzle climb better than the competition

### MAGAZINE OPTIONS

# STOCK TYPE

## SP

Sierra's new collapsible stock offers shooters the ultimate fine point adjustment. Adjustable length of pull and cheek comb allows you to dial in the perfect fit.

## XP

The standard stock offers users a robust classic look with the functionality of a modern day pistol grip. Its extremely durable and ready to use.

## CLS

The classic stock option offers traditional shooters who have used traditional style rib shotguns the same great feel they have grown accustomed to.

## **AUTO REGULATED GAS SYSTEM**

Sierra's high quality shotgun barrels are constructed from certified grade 4140 steel with chrome lined bores. The barrels are threaded for Benelli Mobil chokes. The enhanced barrels improve the versatility and performance of your shotgun.

47 cm | 18,5"

## **INERTIAL RETURNED HEAD SYSTEM**

# **CHOKE TECHNOLOGY**

Long tube extends beyond the length of the muzzle features highly polished interior for less pellet deformation; reduced fliers and tighter patterns. Knurled grasping band speeds installation and removal. Choke constrictions is marked on band so there is no need to remove choke
