

SIBEREIA

Siberia

Superiority in Every Shot

The Siberia® Tactical is a versatile pump-action shotgun. It allows you to shoot light target loads to heavy buckshot loads. The shotgun features a forearm with a return spring, enabling rapid firing by simply pulling back and releasing. The spring can be removed for traditional pump-action operation. It also has a picatinny rail under the forearm for accessory attachment. The shotgun includes a removable choke system with one choke tube (Cyl), a choke box, and a wrench. Its stock and forearm are highly durable, and it comes with a rubber recoil pad. The firearm is backed by a two-year warranty, ensuring reliability and support.
